

SNAP TOGETHER WYES

The SNAP TOGETHER Wye was designed to save significant inventory space and shipping costs with its two piece snap together design. The Wye is best used for splitting branch runs for supply or return as well as branching exhaust runs.

The two sizes replace 12 different metal wyes. The HTY-12 can be easily cut to fit 12", 10" or 8" branch runs and the HTY-8 will fit 8", 7", 6" or 5" runs.

HTY 8	HTY-12
CUTS TO	CUTS TO
8"-6"-6"	12"-10"-10"
8"-6"-5"	12"-10"-8"
8"-5"-5"	12"-8"-8"
7"-6"-6"	10"-10"-10"
7"-6"-5"	10"-10"-8"
7"-5"-5"	10"-8"-8"

HOW TO ASSEMBLE

- 1 Take two sections of the wye and cut each branch to size required as necessary.
- 2 Stand up two wye sections mirroring each other.
- 3 Line up posts and receptors to snap together each branch.
- 4 Snap over latch to lock each branch before moving to next one.
