

Ultravation® Orion

Adjustable electrode position for internal or external HVAC installation

External mount electrode position

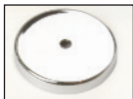

Internal mount electrode position

Positive and negative ions are emitted from the two adjustable electrodes. A magnet is provided for attaching the unit internally.

Pre filter

Blower

Plenum

Ion generator for IAQ
Remove the microscopic particulates and respiratory irritants that filters alone can't capture

Adds new freshness to the air!

- **Orion's negative and positive IONS electrically charge the smallest airborne particulates** causing them to bind together in groups large enough for capture in filtration. *Enhances the efficiency of any air filter.*
 - **Adds an additional stage of VOC breakdown**, expanding the field of VOC reduction.
 - **Aggressively breaks up small particulates** such as smoke while the PCO purifier removes the odor.
 - **Use independently or to complement other IAQ devices.**
-
- **Works with any HVAC system, mounts internally and externally.**
 - **3 times more powerful than typical designs.**
 - **Compact to fit in strategic locations.**
 - **Magnetic mount included.**
 - **Connects to any 24 VAC transformer or any existing Ultravation 24 volt IAQ product.**
 - **6 ft. quick release power cord included.**
 - **Wall plug-in adapter available.**
 - **NO ozone.**
 - **5 year warranty.**

Great for ice machines and Ptac systems, too.
