

# UVMatrix™ ClearCubes™

**UV Disinfection for Ice Machines**  
*Kills bacteria and mold*

**Keep your ice machine sanitized at all times with UV light**, for safer operation and fewer cleanings / maintenance operations. The Ultravation UVMatrix ClearCube™ germicidal UV light system is specially-designed to kill germs on machine surfaces and on the ice itself, keeping the system and contents consistently more microbe free.

- **Safer, cleaner ice:** Applies germicidal UV 24/7 to keep microbial growth down at all times—preventing the gradual build up that happens between conventional cleanings.
- **Reduces maintenance costs** by reducing the number of cleanings needed.
- **Effective against all types of organisms** — including mold.
- **Odor Reduction:** Dual Bandwidth Advanced Oxidation UV Lamp reduces odors.
- **Flexible:** Convenient to install compact electronic power supply available for 120 or 240 VAC power.
- **Universal fit:** Engineered to fit all ice machines with its twin adjustable light shields.
- **Convenient installation:** Installs using high-tack adhesive strip mounting.
- **HVAC:** Great for keeping interior HVAC surfaces such as coils, drain pans and blowers free of mold.

Clear Cube systems use a unique Dual-Bandwidth UV-C lamp increases germ-killing power and removes odors.

Disinfects without chemicals

Excludes UV lamp

Proudly Made in USA

ClearCubes™ Model	Description	Operating Voltage	Lamp Length	Construction
CC-9-120	Ice machine UV with Teflon coated lamp	120	9"	Stainless
CC-9-240	Ice machine UV with Teflon coated lamp	240	9"	Stainless
CC-18-120	Ice machine UV with Teflon coated lamp	120	18"	Stainless
CC-18-240	Ice machine UV with Teflon coated lamp	240	18"	Stainless
