

Did you know?

Your HVAC system can become the source of high concentrations of allergens as internal bio-growth including mold emits millions of spores.

Even a thin bio-film measuring just a few thousandths of an inch on a cooling coil can reduce HVAC efficiency by 30% to 50% as well as cause musty HVAC odors.

As an HVAC system distributes cooled air, it also distributes airborne microorganisms throughout a home, including bacteria, viruses and allergens.

Use the power of UV light to your advantage with **UVC-Advantage™**

UVC-Advantage™

Features

Germicidal UV	9,000 hr. lamp life
Integrated design	One-piece powered UV lamp
Increased HVAC efficiency	Up to \$30 in energy savings per year
12" or 17" lamp	Fits any HVAC system
Magnet mount	Convenient mounting system
Mounting plate	Galvanized steel for duct board and attaching options
No ozone	UVC-Advantage UV modules emit no ozone

How to buy UVC-Advantage

UVC-Advantage™ is sold and installed by HVAC Professionals

Proper integration of Ultravation® IAQ products into an HVAC system takes the expertise of an HVAC contractor, who can evaluate IAQ improvement needs and HVAC equipment to determine the best IAQ product(s) to accomplish your goals. This will assure optimum performance for the entire system.

Ultravation® UVC-Advantage™

UV Light for HVAC Interior Surface Disinfection
 Innovative compact one-piece integrated design

Enjoy fresher, more allergen-free air

Saves Energy • Reduces HVAC wear and tear
 Fits any central air conditioning system.

Ultravation®

Better Air | Better Water | Better Living™

Ultravation® UVC-Advantage™

Germicidal UV Light for HVAC

- **UV stops the mold, fungus and bacteria** laden sludge that clogs HVAC drain pans and drain lines.
- **Allergy relief!** Reduces or eliminates allergens generated inside the air conditioner.
- **Prevents “HVAC dirty-sock smell”.**
- **Optimizes cooling efficiency!** UVC-Advantage prevents the bio-film that insulates cooling coils and degrades cooling making your HVAC system work harder. Increasing efficiency reduces HVAC wear and tear.
- **Reduces electricity costs!** With UVC-Advantage your HVAC system operates at peak efficiency 24/7.

*For fresher, cleaner
& healthier air!*

A compact, integrated UV Light module that stops HVAC contamination for a healthier indoor environment

UVC-Advantage!

It cleans your HVAC system of mold and other bio-contamination using germicidal UV-C light, a natural disinfectant. It works the same way UV light from the sun controls microorganisms outdoors. UVC-Advantage prevents bio-growth on HVAC components and keeps them clean 24/7. Sized small so that the lamp and power supply form one unit. UVC-Advantage is an integrated UV light system that comes in 12 or 17 inch lengths to fit any HVAC system.

UVC-Advantage's small size allows for flexible mounting in the air conditioner. It will disinfect coil, drain pan, blower and other surfaces.

**With UVC-Advantage,
colds, sniffles and allergic
reactions can be
significantly reduced**

Comes in 12 or 17 inch lengths to accommodate any HVAC unit.

**9,000hr True Lifetime
UV Module Warranty**

The warranty covers the UV module's entire 9,000 hour life!
