

# HUMID-AIRE MODEL FH-400

## The World's Finest Humidifier — Fully Equipped.

- The optional SENTINEL timer and pump flushes the reservoir every five (5) hours of operation.
- Convenient pilot light shows when the SENTINEL is operating.
- Illuminated front observation port glows when unit is running to show water level.
- Separate float compartment is away from all moving parts.
- Outside water level adjustment without removing the unit from the installation.
- Tilt in/tilt out mounting frame simplifies installation and removal of unit for service.
- Heavy duty motor and transmission.
- Total convenience is engineered into the installation and maintenance of this humidifier.

### AUXILIARY OVERFLOW PORT

A "fail-safe" device that prevents accidental spillage into the motor compartment or furnace.

### ISOLATED FLOAT CONTROL

Bronze, stainless steel and high temperature plastic construction.

### SLIDE ON/SLIDE OFF VENTED MOTOR COWLING

### THE AUTOMATIC FLUSHING OPTION

If you live in a hard water area — we recommend the factory-installed flushing device. Can be field installed. This unit will automatically flush the water in the reservoir every 5 hours of operation.

- Reduce the need for cleaning.
- Removes sediment & lime build-up.
